**ARTÍCULO**

Slip roll machine FTX-2050X170-CMM 400V / F3 4,0KW Hardened Rollers + DRO

**DESCRIPCIÓN**

er is designed to offer Maximum precision, ease of use and security, becoming the ideal tool for work with Light and medium aluminum sheets or stainless steel. Featured features: Easy handling Thanks to the mobile control panel with push buttons. Conical bending device For greater versatility in the work. Manual fall end, which facilitates the extraction of the finished ferrule. SAE 1050 steel rollers hardened by induction, with quality certificate and high tensile strength. Two rollers powered By a single gearbox and gear system, guaranteeing power and efficiency. Main racks of spheroidal cast iron, which provide great robustness and durability. Main engine with brake system, which ensures precise control and greater security. Wire slots At the ends of the rollers, expanding the possibilities of use. Complies with the EC Security Directives, ensuring safe and reliable operation. This cylinder combines Technology, Resistance and precision, offering optimal performance in workshops and industrial environments.

**DATOS TÉCNICOS**

<b>Alimentación</b>	400V/F3
<b>Potencia</b>	4 - 5.4 kW-HP
<b>Power rear roller</b>	1.1 - 1.5 kW-HP
<b>Precured capacity</b>	4/5 mm.
<b>Curved capacity</b>	5/6 mm.
<b>Useful length of work</b>	2050 mm.
<b>Roller diameter</b>	170 mm.
<b>Minimum curved diameter</b>	255 mm.
<b>Dimensions product</b>	3850x720x1050 mm.
<b>Peso Neto/Bruto</b>	2100 Kg.
