ARTÍCULO

MIG / MAG SMARTMIG 182 230V-F1 GAS / NO GAS

DESCRIPCIÓN

MIG / MAG 180A single-phase welding equipment. Ideal for the craftsman, it is designed for the combination and repair or maintenance of sheets or profiling of steel, stainless steel, and aluminum with use that is not intensive. Simple and intuitive adjustment with the "SMART" solution To weld in workshop. With this configuration, you can accept thread from 0.6 to 1mm. To weld in the exposed environment that does not allow gas to use. With this configuration, you can accept tubular contribution wire from 0.9 to 1.2mm. Kit No Gaz (041240) Delivered with its 3M disconnectable torch 150a to facilitate the change of thread and sheath. Powerful 40W motor to ensure a constant winding. Accepts rolls of 200 and 300 mm in diameter. Accept 4m³ gas cylinders

DATOS TÉCNICOS

Voltage	230V/F1
Fuse	16 Amp.
Open circuit voltage	28 - 45 Volt.
Welding current range	35 - 180 AMP.
Servicio EN60974-1 (40°C)	140 @ 15% - 80 @ 60% AMP.
Welding positions	4 n°
Antorcha EURO	SI
Compatible generator	4.8 / 6.0 kW / kva.
Weight net-gross	4700 kg.

Dimensions	790x770x470 mm.
